

Final Project - One Pager
Lauren Wilson

Short Elevator Pitch:

My goal is to create a website that showcases my professional accomplishments, as well as past design projects and music experience.

Long Elevator Pitch:

I would like to create a website that gives the user an understanding of who I am and the work I do. It will showcase my resume, portfolio, and arrangement library. I hope to work in the entertainment industry. I'm not entirely sure whether it will be television, movies, or music, but don't want to limit myself to one specific section. This website will give peers and potential employers an idea of who I am and the work I do that relates to the entertainment industry. I hope to have it consist of a resume section, relevant design work, past performances, and a library of my arrangements from my a cappella group.
